Subject: Microsoft settlement

I oppose Microsoft's proposed settlement to the anti-trust suit because donating Windows computers is just another marketing move disguised as a 'punishment'. They should donate the money for schools to spend as they wish. If they insist on donating computers, 1/3 should be Windows computers, 1/3 Mac and 1/3 Unix machines.

Settlements of criminal trials are supposed to hurt - they are not supposed to act in furtherance of the business which has been found guilty.
